² 'The two year target is based on a ratio derived from the level of ambition between the expected reduction in re-offending by the identified cohort of PPOs (derived from the evidence provided by the PPO national evaluation) and the area's agreed improvement target for year 2 of the LAA (2009/10). The ratio is common across both years 2 and 3, and will be applied to the expected level of performance for the year 3 cohort, to derive the year 3 improvement target.

In year 2 (2009/10), the agreed improvement target is 18 based on a ratio of 1.13. 1.13 will accordingly be applied to the expected level of performance for the refreshed year 3 cohort, which will be identified before the beginning of year 3, to produce the percentage year 3 improvement target.'

³ It has been acknowledged nationally that the aspirational targets set for teenage pregnancy (NI 112) are now too stretching and have therefore become inoperable at the current rates. Accordingly Government has agreed for results for this indicator to be excluded from the calculation of any Performance Reward Grant payable at the conclusion of this LAA.
