

BRIEFING

Improve - Integrated management and proactive care for the vulnerable and elderly (IMProVE) Process for Formal Consultation

Overview

South Tees Clinical Commissioning Group (CCG) attended Overview and Scrutiny on the 27th of January, 2014 to present the results of our public engagement on the IMProVE programme and to discuss the process for formal engagement with the public on potential options for further advancing our vision for care for the vulnerable and elderly.

The CCG would like now like to present a proposed timeline for a 13 week formal public consultation and gain views on whether members feel this is line with OSC arrangements for the proposed purdah period before the European elections due to take place on the 22nd of May.

We would also like to give you a brief overview of what our potential options might mean for the population of South Tees and the criteria we have developed to support our decisions.
