

Responsible Investment Policy

Border to Coast Pensions Partnership

~~November 2021~~

January 2023

Responsible Investment Policy

This Responsible Investment Policy details the approach that Border to Coast Pensions Partnership ~~will~~ follows in fulfilling its commitment to our Partner Funds in their delegation of the implementation of certain responsible investment (RI) and stewardship responsibilities.

1. Introduction

Border to Coast Pensions Partnership Ltd is an FCA-authorized investment fund manager (AIFM). It operates investment funds for its eleven shareholders which are Local Government Pension Scheme funds (Partner Funds). The purpose is to make a difference to the investment outcomes for our Partner Funds through pooling to create a stronger voice; working in partnership to deliver cost effective, innovative, and responsible investment now and into the future; thereby enabling great, sustainable performance.

Border to Coast takes a long-term approach to investing and believes that businesses that are governed well, have a diverse board and run in a sustainable way are more resilient, able to survive shocks and have the potential to provide better financial returns for investors. Diversity of thought and experience on boards is significant for good governance, reduces the risk of 'group think' leading to better decision making. Environmental, social and governance (ESG) issues can have a material impact on the value of financial assets and on the long-term performance of investments, and therefore need to be considered across all asset classes in order to better manage risk and generate sustainable, long-term returns. Well-managed companies with strong governance are more likely to be successful long-term investments.

Border to Coast is an active owner and steward of its investments, ~~both internally and externally managed~~, across all asset classes. This commitment is demonstrated through achieving signatory status to the Financial Reporting Council UK Stewardship Code. The commitment to responsible investment is communicated in the Border to Coast UK Stewardship Code compliance statement. As a long-term investor and representative of asset owners, we ~~will~~ hold companies and asset managers to account regarding environmental, societal and governance factors that have the potential to impact corporate value. We ~~will~~ incorporate such factors into our investment analysis and decision making, enabling long-term sustainable investment performance for our Partner Funds. As a shareowner, Border to Coast has a responsibility for effective stewardship of the companies it invests in, whether directly or indirectly through mandates with fund managers. It ~~will~~ practices active ownership through voting, monitoring companies, engagement and litigation.

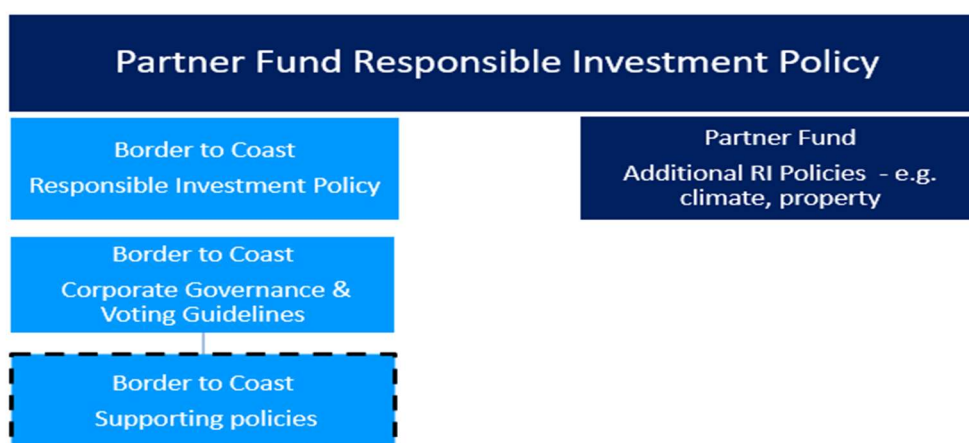

1.1. Policy framework

The LGPS (Management and Investment of Funds) 2016 regulations state that the responsibility for stewardship, which includes shareholder voting, remains with the Partner Funds. Stewardship day-to-day administration and implementation have been delegated to Border to Coast by the Partner Funds, on assets managed by Border to Coast, with appropriate monitoring and challenge to ensure this continues to be in line with Partner Fund requirements. To leverage scale and for operational purposes, Border to Coast has, in conjunction with Partner Funds, developed this RI Policy and accompanying Corporate Governance & Voting Guidelines to ensure clarity of approach on behalf of Partner Funds. This collaborative approach results in an RI policy framework illustrated below with the colours demonstrating ownership of the various aspects of the framework:

RI Policy Framework

RI Policy Framework

2. What is responsible investment?

Responsible investment (RI) is the practice of incorporating ESG issues into the investment decision making process and practicing investment stewardship, to better manage risk and generate sustainable, long-term returns. Financial and ESG analysis together identify broader risks and the opportunities leading to better informed investment decisions and can improve performance as well as risk-adjusted returns.

Investment stewardship includes active ownership, using voting rights, engaging with investee companies, influencing regulators and policy makers, and collaborating with other investors to improve long-term performance.

3. Governance and Implementation

Border to Coast takes a holistic approach to the integration of sustainability and- responsible investment, which are ~~and as such it is~~ at the core of our corporate and investment thinking.

Sustainability, which includes RI, is considered and overseen by the Board and Executive Committees. Specific policies and procedures are in place to demonstrate the commitment to RI, which include the Responsible Investment Policy and Corporate Governance & Voting Guidelines (available on the [website](#)). Border to Coast has dedicated staff resources for managing RI within the organisational structure.

The RI Policy is owned by Border to Coast and created after collaboration and engagement with our eleven Partner Funds. The Chief Investment Officer (CIO) is accountable for implementation of the policy. The policy is monitored with regular reports to the CIO, Investment Committee, Board, Joint Committee and Partner Funds. It is reviewed at least annually or whenever revisions are proposed, taking into account evolving best practice, and updated, as necessary.

4. Skills and competency

Border to Coast ~~will~~, where needed, ~~take~~s proper advice in order to formulate and develop policy. The Board and staff ~~will~~ maintain appropriate skills in responsible investment and stewardship through continuing professional development; where necessary expert advice ~~is~~ ~~will be~~ taken from suitable RI specialists to fulfil our responsibilities.

5. Integrating RI into investment decisions

Border to Coast considers material ESG factors when analysing potential investments. ESG factors tend to be longer term in nature and can create both risks and opportunities. It is therefore important that, as a long-term investor, we take them into account when analysing potential investments.

The factors considered are those which could cause financial and reputational risk, ultimately resulting in a reduction in shareholder value. ESG issues ~~are~~~~will be~~ considered and monitored in relation to ~~both internally and externally managed all~~ asset ~~classes~~. The CIO ~~is~~~~will be~~ accountable for the integration and implementation of ESG considerations. Issues considered include, but are not limited to:

Environmental	Social	Governance	Other
Climate change	Human rights	Board independence/ D iversity of thought	Business strategy
Resource & energy management	Child labour	Executive pay	Risk management
Water stress	Supply chain	Tax transparency	Cyber security
Single use plastics	Human capital	Auditor rotation	Data privacy
Biodiversity	Human capital	Succession planning	Bribery & corruption
	Employment standards	Shareholder rights	Political lobbying
	Pay conditions (e.g. living wage in UK)		

When considering human rights issues, we believe that all companies should abide by the UN Global Compact Principles and the OECD Guidelines for Multinational Enterprises. Companies should have processes in place to both identify and manage human rights risks across their business and supply chain. Further detail on our voting approach is included in the Corporate Governance & Voting Guidelines.

Whilst the specific aspects and form of ESG integration and stewardship vary across asset class, the overarching principles outlined in this policy are applied to all ~~internally and externally~~

~~managed~~ assets of Border to Coast. More information on specific approaches is outlined below.

5.1. Listed equities (Internally managed)

Border to Coast looks to understand and evaluate the ESG-related business risks and opportunities companies face. We consider the integration of ESG factors into the investment process as a necessary complement to the traditional financial evaluation of assets; this results in a more informed investment decision-making process. Rather than being used to preclude certain investments, it is used to provide an additional context for stock selection.

ESG data and research from specialist providers is used alongside general stock and sector research; it is an integral part of the research process and when considering portfolio construction, sector analysis and stock selection. The Head of RI works with colleagues to ensure they are knowledgeable and fully informed on ESG issues. Voting and engagement should not be detached from the investment process; therefore, information from engagement meetings ~~is will be~~ shared with the team to increase and maintain knowledge, and portfolio managers ~~are will be~~ involved in the voting process.

5.2. Private markets

Border to Coast believes that ESG risk forms an integral part of the overall risk management framework for private market investment. An appropriate ESG strategy will improve downside protection and help create value in underlying portfolio companies. Border to Coast takes the following approach to integrating ESG into the private market investment process:

- The assessment of ESG issues is integrated into the investment process for all private market investments.
- A manager's ESG strategy is assessed through a specific ESG questionnaire agreed with the Head of RI and reviewed by the alternatives investment team with support from the Head of RI as required.
- Managers are requested to complete an annual monitoring questionnaire which contains both binary and qualitative questions, enabling us to monitor several key performance indicators, including RI policies, people, and processes, promoting RI and RI-specific reporting.
- Managers are requested to report annually on the progress and outcomes of ESG related values and any potential risks.
- Ongoing monitoring includes identifying any possible ESG breaches and following up with the managers concerned.
- Work with managers to improve ESG policies and ensure the approach is in-line with developing industry best practice.

5.3. Fixed income

ESG factors can have a material impact on the investment performance of bonds, both negatively and positively, at the issuer, sector and geographic levels. ESG analysis is therefore incorporated into the investment process for corporate and sovereign issuers to manage risk. The challenges of integrating ESG in practice are greater than for equities with the availability of data for some markets lacking.

The approach to engagement also differs as engagement with sovereigns is much more difficult than with companies. Third-party ESG data is used along with information from sources including UN bodies, the World Bank and other similar organisations. This together with traditional credit analysis is used to determine a bond's credit quality. Information is shared between the equity and fixed income teams regarding issues which have the potential to impact corporates and sovereign bond performance.

5.4. Real estate

Border to Coast is ~~preparing to launch funds to make~~~~considering making~~ Real Estate investments through both direct properties and ~~indirect through investing in~~ real estate funds. For real estate funds, a central component of the fund selection/screening process will be ~~an assessment of~~~~reviewing~~ the General Partner and Fund/Investment Manager's Responsible Investment and ESG approach and policies. Key performance indicators will ~~include~~~~be~~ energy performance measurement, flood risk and rating systems such as GRESB (formerly known as the Global Real Estate Sustainability Benchmark), and BREEAM (Building Research Establishment Environmental Assessment Method). Our process will review the extent to which they are used in asset management strategies. We are in the process of developing our ESG and RI strategies for direct investment which ~~includes~~~~will involve~~ procuring a third-party manager and working with them to develop ~~our~~~~best-in-class~~ approach to managing ESG risks.

5.5. External manager selection

RI is incorporated into the external manager appointment process including the request for proposal (RFP) criteria and scoring and the investment management agreements. The RFP includes specific requirements relating to the integration of ESG by managers into the investment process ~~which includes assessing and mitigating climate risk, and~~~~and to~~ their approach to engagement.

~~–~~We expect to see evidence of how material ESG issues are considered in research analysis and investment decisions. Engagement needs to be structured with clear aims, objectives and milestones.

Voting is carried out by Border to Coast for both internally and externally managed equities where possible and we expect external managers to engage with companies in alignment with the Border to Coast RI ~~P~~policy.

The monitoring of appointed managers ~~will~~ also ~~include~~~~s~~ assessing stewardship and ESG integration in accordance with our policies. All external fund managers ~~are~~~~will be~~ expected to be signatories or comply with international standards applicable to their geographical location. We ~~will~~ encourage managers to become signatories to the UN-supported Principles for Responsible Investment¹ ('PRI'). ~~We also encourage managers to make a firm wide net zero commitment and to join the Net Zero Asset Manager initiative (NZAM) or an equivalent initiative.~~ Managers ~~are~~~~will be~~ required to report to Border to Coast on their RI activities quarterly.

¹ [The UN-supported Principles for Responsible Investment \(PRI\) is the world's leading advocate for responsible investment enabling investors to publicly demonstrate commitment to responsible investment with signatories committing to supporting the six principles for incorporating ESG issues into investment practice.](#)

5.6. Climate change

The world is warming, the climate is changing, and the scientific consensus is that this is due to human activity, primarily the emissions of carbon dioxide (CO₂) from burning fossil fuels. We support this scientific consensus; recognising that the investments we make, in every asset class, will both impact climate change and be impacted by climate change. We actively consider how climate change, the shifting regulatory environment and potential macroeconomic impact will affect investments. We believe that we have the responsibility to contribute and support the transition to a low carbon economy in order to positively impact the world in which pension scheme beneficiaries live in.

Climate change is a systemic risk with potential financial impacts associated with the transition to a low-carbon economy and physical impacts that may manifest under different climate scenarios. Transition will affect some sectors more than others, notably energy, utilities and sectors highly reliant on energy. However, within sectors there are likely to be winners and losers which is why divesting from and excluding entire sectors may not be appropriate.

~~We believe that using our influence through ongoing engagement with companies, rather than divestment, drives positive outcomes. This is fundamental to our responsible investment approach. Our investment approach is not to divest or exclude entire sectors, however there may be specific instances when we will look to sell or not invest in some industries based on investment criteria, the investment time horizon and the likelihood for success in influencing company strategy and behaviour. Using these criteria and due to the potential for stranded assets, we interpret this to cover pure coal and tar sands companies and will therefore not invest in these companies. Any companies excluded will be monitored and assessed for progress and potential reinstatement at least annually. In addition, the transition to a low-carbon economy will undoubtedly affect the various stakeholders of the companies taking part in the energy transition. These stakeholders include the workforce, consumers, supply chains and the communities in which the companies' facilities are located. A just transition involves maximising the social and economic opportunities and minimising and managing challenges of a net zero transition. We expect companies to consider the potential stakeholder risks associated with decarbonisation.~~

Detail on Border to Coast's approach to managing the risks and opportunities associated with climate change can be found in our Climate Change Policy on our website.

6. Stewardship

As a shareholder Border to Coast has a responsibility for effective stewardship of the companies it invests in, whether directly or indirectly through mandates with fund managers. It practises active ownership through the full use of rights available including voting, monitoring companies, engagement and litigation. As a responsible shareholder, we are committed to being a signatory to the 2020 UK Stewardship Code² and were accepted as a signatory in March 2022. have made an application to become a signatory by submitting our 2021

² The UK Stewardship Code aims to enhance the quality of engagement between investors and companies to help improve long-term risk-adjusted returns to shareholders. <https://www.frc.org.uk/directors/corporate-governance-and-stewardship>

~~Responsible Investment & Stewardship Report to the Financial Reporting Council; Wwe are also a signatory to the PRI UN-supported Principles of Responsible Investment³.~~

6.1. Voting

Voting rights are an asset and Border to Coast ~~will~~ exercises its rights carefully to promote and support good corporate governance principles. It ~~will~~ aims to vote in every market in which it invests where this is practicable. To leverage scale and for practical reasons, Border to Coast has developed a collaborative voting policy to be enacted on behalf of the Partner Funds which can be viewed on our ~~website at: Corporate Governance & Voting Guidelines~~. Where possible the voting policies ~~are~~will also ~~be~~ applied to assets managed externally. Policies ~~are~~will be reviewed annually in collaboration with the Partner Funds. There may be occasions when an individual fund may wish Border to Coast to vote its pro rata holding contrary to an agreed policy; there is a process in place to facilitate this. A Partner Fund wishing to diverge from this policy will provide clear rationale in order to meet the governance and control frameworks of both Border to Coast and, where relevant, the Partner Fund.

6.1.1. Use of proxy advisors

Border to Coast ~~use appointed Robeco as~~ Voting and Engagement provider to implement the set of detailed voting guidelines and ensure votes are executed in accordance with policies. ~~Details of the third-party Voting and Engagement provider and proxy voting advisor are included in Appendix A.~~

A proxy voting platform is used with proxy voting recommendations produced for all meetings voted managed by ~~Robeco as~~ the Voting & Engagement provider. ~~The Robeco's~~ proxy voting advisor (~~Glass Lewis Co~~) provides voting recommendations based upon Border to Coast's Corporate Governance & Voting Guidelines ('the Voting Guidelines'). A ~~Robeco~~ team of dedicated voting analysts analyse the merit of each agenda item to ensure voting recommendations are aligned with the Voting Guidelines. Border to Coast's Investment Team receives notification of voting recommendations ahead of meetings which are assessed on a case-by-case basis by portfolio managers and responsible investment staff prior to votes being executed. A degree of flexibility is required when interpreting the Voting Guidelines to reflect specific company and meeting circumstances, allowing the override of voting recommendations from the proxy adviser.

~~The Voting and Engagement provider Robeco~~ evaluates ~~its~~their proxy voting agent at least annually, on the quality of governance research and the alignment of customised voting recommendations and Border to Coast's Voting Guidelines. This review is part of ~~the Robeco's~~ control framework and is externally assured. Border to Coast also monitors the services provided ~~by Robeco~~ monthly, with a six monthly and full annual review.

Border to Coast has an active stock lending programme. Where stock lending is permissible, lenders of stock do not generally retain any voting rights on lent stock. Procedures are in place to enable stock to be recalled prior to a shareholder vote. Stock ~~is~~will be recalled ahead of meetings, and lending can also be restricted, when any, or a combination of the following, occur:

- The resolution is contentious.

³~~The UN-supported Principles for Responsible Investment (PRI) is the world's leading advocate for responsible investment enabling investors to publicly demonstrate commitment to responsible investment with signatories committing to supporting the six principles for incorporating ESG issues into investment practice.~~

- The holding is of a size which could potentially influence the voting outcome.
- Border to Coast needs to register its full voting interest.
- Border to Coast has co-filed a shareholder resolution.
- A company is seeking approval for a merger or acquisition.
- Border to Coast deems it appropriate.

Proxy voting in some countries requires share blocking. This requires shareholders who want to vote their proxies to deposit their shares before the date of the meeting (usually one day after cut-off date) with a designated depository until one day after meeting date.

During this blocking period, shares cannot be sold; the shares are then returned to the shareholders' custodian bank. We may decide that being able to trade the stock outweighs the value of exercising the vote during this period. Where we want to retain the ability to trade shares, we may refrain from voting those shares.

Where appropriate Border to Coast ~~will~~ considers s co-filing shareholder resolutions and ~~will~~ notify esy Partner Funds in advance. Consideration iswill-be given as to whether the proposal reflects Border to Coast's Responsible Investment policy, is balanced and worded appropriately, and supports the long-term economic interests of shareholders.

6.2. Engagement

The best way to influence companies is through engagement; therefore, Border to Coast will not divest from companies principally on social, ethical or environmental reasons. As responsible investors, the approach taken iswill-be to influence companies' governance standards, environmental, human rights and other policies by constructive shareholder engagement and the use of voting rights.

The services of specialist providers may be used when necessary to identify issues of concern. Meeting and engaging with companies are an integral part of the investment process. As part of our stewardship duties, we monitor investee companies on an ongoing basis and take appropriate action if investment returns are at risk. Engagement takes place between portfolio managers and investee companies across all markets where possible.

Border to Coast has several approaches to engaging with investee holdings:

- Border to Coast and all eleven Partner Funds are members of the Local Authority Pension Fund Forum ('LAPFF'). Engagement takes place with companies on behalf of members of the Forum across a broad range of ESG themes.
- We ~~will~~ seek to work collaboratively with other like-minded investors and bodies in order to maximise Border to Coast's influence on behalf of Partner Funds, particularly when deemed likely to be more effective than acting alone. This iswill-be achieved through actively supporting investor RI initiatives and collaborating with various other external groups e.g. LAPFF, the Institutional Investors Group on Climate Change, other LGPS pools and other investor coalitions.

- Due to the proportion of assets held in overseas markets it is imperative that Border to Coast is able to engage meaningfully with global companies. To enable this and complement other engagement approaches, Border to Coast use an external ~~V~~voting and ~~E~~engagement service provider. ~~has been appointed. We Border to Coast~~ provides input into new engagement themes which are considered to be materially financial, selected by the external engagement provider on an annual basis, and also participates in some of the engagements undertaken on our behalf.
- Engagement ~~will~~ takes place with companies in the internally managed portfolios with portfolio managers and the Responsible Investment team engaging directly across various engagement streams; these ~~will~~ cover environmental, social, and governance issues as well as UN Global Compact⁴ breaches or OECD Guidelines⁵ for Multinational Enterprises breaches.
- We ~~will~~ expect external managers to engage with investee companies and bond issuers as part of their mandate on our behalf and in alignment with our RI policies.

Engagement conducted can be broadly split into two categories: engagement based on financially material ESG issues, or engagement based on (potential) violations of global standards such as the UN Global Compact or OECD Guidelines for Multinational Enterprises.

When engagement is based on financially material ESG issues, engagement themes and companies are selected in cooperation with our engagement service provider based on an analysis of financial materiality. Such companies are selected based on their exposure to the engagement topic, the size and relevance in terms of portfolio positions and related risk.

For engagement based on potential company misconduct, cases are selected through the screening of news flows to identify breaches of the UN Global Compact Principles or OECD Guidelines for Multinational Enterprises. Both sets of principles cover a broad variety of basic corporate behaviour norms around ESG topics. Portfolio holdings are screened on the on-1) validation of a potential breach, -2) the severity of the breach and -3) the degree of to which management can be held accountable for the issue. For all engagements, SMART⁶ engagement objectives are defined.

In addition, internal portfolio managers and the Responsible Investment team monitor holdings which may lead to selecting companies where engagement may improve the investment case or can mitigate investment risk related to ESG issues. Members of the investment Team have access to our engagement provider's thematic research Active Ownership profiles and engagement records. This additional information feeds into the investment analysis and decision making process.

⁴ UN Global Compact is a shared framework covering 10 principles, recognised worldwide and applicable to all industry sectors, based on the international conventions in the areas of human rights, labour standards, environmental stewardship and anti-corruption.

⁵ OECD Guidelines for Multinational Enterprises are recommendations providing principles and standards for responsible business conduct for multinational corporations operating in or from countries adhering to the OECD Declaration on International and Multinational Enterprises.

⁶ SMART objectives are: specific, measurable, achievable, relevant and time bound.

We engage with regulators, public policy makers, and other financial market participants as and when required. We encourage companies to improve disclosure in relation to ESG and to report and disclose in line with the TCFD recommendations.

6.2.1. Engagement themes

Recognising that we are unable to engage on every issue, we focus our efforts on areas that are deemed to be the most material to our investments - our key engagement themes. These are used to highlight our priority areas for engagement which includes working with our Voting and Engagement provider and in considering collaborative initiatives to join. We do however engage more widely via the various channels including LAPFF and our external managers.

Key engagement themes are reviewed on a three yearly basis using our Engagement Theme Framework. There are three principles underpinning this framework:

- that progress in the themes is expected to have a material financial impact on our investment portfolios in the long-term;
- that the voice of our Partner Funds should be a part of the decision; and
- that ambitious, but achievable milestones can be set through which we can measure progress over the period.

When building a case and developing potential new themes we firstly assess the material ESG risks across our portfolios and the financial materiality. We also consider emerging ESG issues and consult with our portfolio managers and Partner Funds. The outcome is for the key themes to be relevant to the largest financially material risks; for engagement to have a positive impact on ESG and investment performance; to be able to demonstrate and measure progress; and for the themes to be aligned with our values and important to our Partner Funds.

The key engagement themes following the 2021 review are:

- Low Carbon Transition
- Diversity of thought
- Waste and water management
- Social inclusion through labour management

6.2.2. Escalation

Border to Coast believe that engagement and constructive dialogue with the companies in which it invests is more effective than excluding companies from the investment universe. However, if engagement does not lead to the desired result escalation may be necessary. A lack of responsiveness by the company can be addressed by conducting collaborative engagement with other institutional shareholders, registering concern by voting on related agenda items at shareholder meetings, attending a shareholder meeting in person and filing/co-filing a shareholder resolution. If the investment case has been fundamentally weakened, the decision may be taken to sell the company's shares.

6.2.3 Exclusions

We believe that using our influence through ongoing engagement with companies, rather than divestment, drives positive outcomes. This is fundamental to our responsible investment approach. Our investment approach is not to divest or exclude entire sectors, however there may be specific instances when we will look to sell or not invest in some industries based on investment criteria, the investment time horizon, and the likelihood for success in influencing company strategy and behaviour.

When considering whether a company is a candidate for exclusion, we do so based on the associated material financial risk of a company's business operations and whether we have concerns about its long-term viability. We initially assess the following key financial risks:

- regulatory risk
- litigation risk
- reputational risk
- social risk
- environmental risk

Thermal coal and oil sands:

Using these criteria and due to the potential for stranded assets, we will not invest in companies with more than 70% of revenues derived from thermal coal and oil sands. We will continue to monitor companies with such revenues for increased potential for stranded assets and the associated investment risk which may lead to the revenue threshold decreasing over time.

We support a just transition towards a low-carbon economy which should be inclusive and acknowledge existing global disparities. We recognise that not all countries are at the same stage in their decarbonisation journey and need to consider the different transition timelines for emerging market economies. Therefore, in the interests of a just transition we will assess the implications of the exclusion policy and where we consider it appropriate, may operate exceptions.

For illiquid assets the threshold will be 25%. This is due to the long-term nature of the investments and less ability for investors to change requirements over time.

Cluster munitions:

In addition, we will not invest in companies contravening the Convention on Cluster Munitions (2008). It is illegal to use these weapons in many jurisdictions and many signatories to the Convention regard investing in the production of cluster munitions as a form of assistance that is prohibited by the convention. Therefore, as a responsible investor we will not invest in the following:

- Companies where there is evidence of manufacturing cluster munition whole weapons systems.
- Companies manufacturing components that were developed or are significantly modified for exclusive use in cluster munitions.

Companies that manufacture "dual-use" components, such as those that were not developed or modified for exclusive use in cluster munitions, will be assessed and excluded on a case-by-case basis.

Restrictions relate to the corporate entity only and not any affiliated companies.

Any companies excluded will be monitored and assessed for progress and potential reinstatement at least annually.

6.3. Due diligence and monitoring procedure

Internal procedures and controls for stewardship activities are reviewed by Border to Coast's external auditors as part of the audit assurance (AAF) control review. ~~Robeco, as t~~ The external Voting and Engagement provider, is also monitored and reviewed by Border to Coast on a regular basis to ensure that the service level agreement is met.

The Voting and Engagement provider Robeco also undertakes verification of its stewardship active ownership activities and the Robeco's external auditor audits stewardship active ownership controls on an annual basis; this audit is part of the annual International Standard for Assurance Engagements control.

7. Litigation

Where Border to Coast holds securities, which are subject to individual or class action securities litigation, ~~we will~~, where appropriate, we participate in such litigation. There are various litigation routes available dependent upon where the company is registered. ~~We will~~ use a case-by-case approach to determine whether or not to participate in a class action after having considered the risks and potential benefits. ~~We will~~ work with industry professionals to facilitate this.

8. Communication and reporting

Border to Coast ~~is will be~~ transparent with regard to its RI activities and ~~will keep~~ s beneficiaries and stakeholders informed. This ~~is will be~~ done by making publicly available RI and voting policies; publishing voting activity on our website quarterly; reporting on engagement and RI activities to the Partner Funds quarterly; ~~and~~ and in our annual RI report.

We also report in line with the Task Force on Climate-related Financial Disclosures (TCFD) recommendations and provide an annual progress report on the implementation of our Net Zero Plan.

9. Training and assistance

Border to Coast ~~will offers~~ s the Partner Funds training on RI and ESG issues. Where requested, assistance ~~will be~~ is given on identifying ESG risks and opportunities in order to help develop individual fund policies and investment principles for inclusion in the Investment Strategy Statements.

The Investment Team receive training on RI and ESG issues with assistance and input from our Voting & Engagement Partner and other experts where required. Training is also provided to the Border to Coast Board and the Joint Committee as and when required.

10. Conflicts of interest

Border to Coast has a suite of policies which cover any potential conflicts of interest between itself and the Partner Funds which are applied to identify and manage any conflicts of interest. this includes potential conflicts in relation to stewardship.
