## Tees Valley CCG – Palliative and End of Life (PEoL) Care - Future work

Update January 2021
Craig Blair – Director of Commissioning
Strategy and Delivery

## Our Aim

To make the last stage of people's lives as good as possible by aligning systems and processes so that everyone works together confidently, honestly and consistently to help that patient and the people important to them

## An opportunity for the Tees Valley

Tees Valley CCG is one of four sites nationally to be identified as a commissioning exemplar site

Exemplar sites selected to support the overarching national commissioning agenda to deliver:

- Publication of a clear commissioning model, supported by national levers and incentives to commission, contract and fund the best PEoL Care for their area
- Integrated and seamless care across providers and organisations

Local sites will support national drivers alongside implementation of an environment which supports co-design and implementation of a PEoL Strategy by 2022

## **Next Steps**

- NHSE issued a Memorandum of Understanding to the CCG for review and feedback by early January
- Plans in place to sign the MoU mid-January and funds will be transferred to the CCG thereafter (expectation is that funding is spent on programme management, events, clinical consultation time etc. It is not to be used for delivery of services)
- CCG are in the process of developing a job description to recruit to the project support role we identified in our bid
- CCG team part of national project groups to drive the agenda forward and provide meaningful feedback into the commissioning and finance modules of the overarching programme
- CCG to form part of and be instrumental in the development of a team that support peer learning across the country
- Locality areas previously undertook a self assessment against the national Ambitions Framework. Plans in place to revisit this across all stakeholders to support wider engagement and assessment of 'where we are now'
- Comprehensive engagement plan in development to use the learning from this self assessment to begin a programme of engagement and ultimately co-design of a future vision for PEoLC
