# Climate Change Policy

## 2.1 Our views and beliefs on climate change

Recognising the existential threat to society that unmitigated climate change represents, in 2015, the nations of the world came together in Paris and agreed to limit global warming to well below 2°C and to pursue efforts to limit the temperature increase to 1.5°C. A key part of the Paris Agreement was an objective to make finance flows consistent with a pathway towards low GHG emissions and climate resilience. This recognises the critical role asset owners and managers play, reinforcing the need for us and our peers to drive and support the pace and scale of change required.

## 3.1 Our ambition – Net Zero

Our climate change strategy recognises that there are financially material investment risks and opportunities associated with climate change which we need to manage across our investment portfolios. We have therefore committed to a net zero carbon emissions target by 2050 at the latest for our assets under management, in order to align with efforts to limit temperature increases to 1.5°C.

## 6.1 Our approach to engagement

In particular, we are currently focusing on the following actions:

- When exercising our voting rights for companies in high emitting sectors that do not sufficiently address the impact of climate change on their businesses, we will oppose the agenda item most appropriate for that issue. To that end, the nomination of the accountable board member takes precedence. Companies that are not making sufficient progress in mitigating climate risk are identified using recognised industry benchmarks including the TPI, CA 100+ Net Zero Company Benchmark and the Urgewald Global Coal Exit List. Additionally, an internally developed framework is used to identify companies with insufficient progress on climate change. Our voting principles are outlined in our Corporate Governance & Voting Guidelines. We are also transparent with all our voting activity and publish our quarterly voting records on our website.
- We will generally vote in favour of shareholder resolutions that are aligned with the objectives of the Paris climate agreement, taking a 'comply or explain' approach, publicly disclosing our rationale if we vote against.
- We will vote against management 'Say on Climate' resolutions that are not aligned with the Paris climate agreement.

- For companies that have high exposure to deforestation risk commodities (palm oil, soy, beef, and timber, paper and pulp), but either don't have adequate policies and processes in place to reduce their impact or are involved in severe deforestation-linked controversies, we will oppose the re-election of the Chair of the Sustainability Committee (or most appropriate agenda item). Assessments of the quality of mitigating actions are based on external benchmarks such as the Forest500.
- We will generally vote in favour of shareholder proposals that ask companies to mitigate deforestation risks, taking a 'comply or explain' approach, publicly disclosing our rationale if we vote against.
- We will co-file shareholder resolutions at company AGMs on climate risk disclosure, emission reduction targets, transition plans, and lobbying, after conducting due diligence, that we consider to be of institutional quality and consistent with our Climate Change Policy.
- Engage with companies in relation to business sustainability, disclosure of climate risk and to publish greenhouse gas emissions reduction targets in line with the TCFD recommendations.
- Engage with the largest emitters across our portfolios on transition plans and science aligned capital expenditure plans.
- Engage with the banking sector as it plays a pivotal role in the transition to a low-carbon economy.
- Engage with our largest portfolio emitters and all fossil fuel companies and banks subject to votes against management due to failure to meet our climate policies.
- Support a Just Transition through collaboration with other investors and consider in our engagement and voting.
- Work collaboratively with other asset owners in order to strengthen our voice and make a more lasting impact for positive change. Engagement is conducted directly, through our engagement partner and through our support of collaborations. We also expect our external asset managers to engage with companies on climate-related issues.
- Implementing our net zero stewardship strategy developed using IIGCC's Net Zero Stewardship Toolkit.
- Use carbon footprints, the TPI toolkit, CA100+ Net Zero Company Benchmark, SBTi along with other data sources to assess companies and inform our engagement and voting activity. This will enable us to prioritise shareholder engagement, set timeframes and monitor progress against our goals.
