Notes

Footfall Rates which involve 'footfall' within the calculation will need to be calculated by the project team this data is not collated by Cleveland Police
 There are two volumetric figures provided for arrests a) based on a count of the number of people arrested in the town centre area FOR ANY OFFENCE b) based on a count of crimes occurring in the town centre which have resulted in least one person being arrested. The latter figure has been used to calculate the 'arrest rate' and this remains subsequent to further change as and when subsequent arrests are made.

Notes

- Footfall Rates which involve 'footfall' within the calculation will need to be calculated by the project team this data is not collated by Cleveland Police
- Patrols This data is only available from May 2026 onwards due to resource allocation processes and is based on those Neighbourhood Officers/PCSO's allocated to the town centre area only. The total number of hours spend in the community excludes any time spent within a police building.
- Arrests There are two volumetric figures provided for arrests a) based on a count of the number of people arrested in the town centre area FOR ANY OFFENCE b) based on a count of crimes occurring in the town centre which have resulted in at least one person being arrested. The latter figure has been used to calculate the 'arrest rate' and this remains subsequent to further change as and when subsequent arrests are made.
