

SCRUTINY PANEL – INVESTIGATION OUTLINE

<p>Review Topic: Inclusive growth – alignment of town regeneration and health goals – ‘Health for Wealth’</p> <p>The ‘Health Equity in England: The Marmot Review 10 Years On’, highlighted a worrying retrograde trend for life expectancy and signalled the widening of local health inequalities in Middlesbrough. The intrinsic link between deprivation and health cannot continue to be ignored, and despite a clear emphasis on austerity within the report, there is a growing realisation that local plans to improve health and regeneration need to be more tightly aligned, in order to see positive and sustainable change to health outcomes, prosperity and social stability.</p>	<p>Investigation By (Scrutiny Panel): Health Scrutiny Panel</p> <p>Type e.g. Full/Task & Finish: Full</p>
---	---

Which of the Mayor’s priorities does the topic meet?

COVID-19 recovery - We will ensure the recovery of local communities, businesses and the Council’s operations from COVID-19, taking opportunities to build back better. (E)

Vulnerability - We will work to address the causes of vulnerability and inequalities in Middlesbrough and safeguard and support those made vulnerable. (E)

<p>Purpose of Investigation:</p> <p>The purpose of the investigation will be to consider how well local economic plans, policies and decision-making processes, support inclusive growth and population health improvement.</p>	<p>Desired Outcomes:</p> <p>To ensure the Council’s ability to shape the conditions for inclusive economies are fully harnessed.</p>
--	---

Terms of Reference:

- To develop a thorough understanding of local issues and the challenges and levers to inclusive economic growth
- To examine how the local authority can work in partnership with the Tees Valley Combined Authority (TVCA) and the Local Enterprise Partnership (LEP) to design a local economy that is good for people’s health including rebuilding an economy that takes stock of the lessons learnt from COVID-19
- To examine how the local authority can capitalise on key assets including anchor institutions to shape economic conditions
- To ensure services are delivered that meet people’s economic and health needs together.

Key Issues/Lines of Enquiry:	Risks (if review was not undertaken):
<p>Role of anchor institutions / pipeline to employment / inclusive recovery / education / deprivation and marginalisation</p>	<p>There is the potential that inequalities could be polarised as investment is concentrated on certain sectors. Over the last fifteen years inequalities have widened and initiatives over that period have failed to benefit those in the most deprived areas of the town.</p>
INFORMATION AND SOURCES	Allocation of Tasks – Who is doing each task:
